Chainsaw chains require regular sharpening to maintain peak performance, because sawing through logs and exposure to dirt can quickly dull the cutting teeth. While all you really need to sharpen the chain is a small file, it takes a long time and it is difficult to achieve consistent results with each tooth. Stihl brand chain sharpeners, electric sharpeners with a small grinding wheel, feature a groove to keep the chain in a fixed position and adjustable grinding wheels, so you can grind the cutters evenly for just a few seconds on the tooth. Different brands of chain sharpeners work the same way. About the author of a former cake decorator and competitive gardener, Amelia Allonsy is most at home in the kitchen or with her hands in the mud.
